-60°C to +135°C IP66 & IP68 (100 metres - 7 Days), Type 4X & DTS01:1991

Gland size does not necessarily equate to the entry thread size. The IP O-ring seal is only available on metric entry threads. IP washers can be supplied for tapered entry threads.

Assembly instructions must be read prior to installation and adhered to in full.

Peppers supply cable glands with parallel entry threads that conform to the flameproof threaded joint requirements of IEC60079-7 and other equivalent standards. They usually incorporate a thread run out according to the available threaded joint requirements of IEC/EN 60079-1 and other equivalent standards. They usually incorporate a thread run out according to the available threaded joint requirements of IEC/EN 60079-1 and other equivalent standards.

When selecting IP Washer material for use with glands, please be aware of the accessories temperature range to ensure they are suitable for the intended installation.

The gland is supplied with the correct amount of the two-part compound, gloves and instructions to allow one complete termination.

Where approval in addition to ATEX, IECEx and CSA is required, this must be clearly requested at time of enquiry / order.

Peppers Cable Glands Limited will not be held responsible for clients’ installations where this has not been taken into account.
